## MARCH MEETING

We shall have the opportunity on Friday evening of hearing Prof. Ralph E. Montonna of the Division of Chemical Engineering at the University of Minnesota. He will speak on "Modern Concepts of the Cellulose Molecule". The meeting will be in Room 140 Bagley Hall, University of Washington at 7:30 p.m., March 12. It was not possible to arrange a group dinner beforehand. The public is cordially invited.

## FUTURE

Meetings are planned for the spring. Although it is becoming increasingly difficult to arrange tours, one other eastern speaker, at least, will be coming this way. The attendance at meetings and dinners has been good during the past year. Your executive committee takes this as a sufficient reason to plan about the usual number of meetings and, when convenient and possible, to plan dinner. However, to fit into the crowded schedules of all of us, we have thought of the possibility of afternoon meetings. Your reactions are solicited to help formulate such plans. Kindly bring the form below to the meeting on Friday or mail it to V. Sivertz at the above address.

I favor a trial of a meeting at 5 p.m. ☐ Comments:

I cannot attend at that hour ☐

I favor the plan of having a group  
dinner after such a meeting ☐
